INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/FR2004/000053

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1	YES
	Claims	9, 11	NO
Inventive step (IS)	Claims	1	YES
	Claims	9, 11	NO
Industrial applicability (IA)	Claims	1, 9, 11	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: EP1179684

D2: EP1170514

1. The present application does not meet the requirements of PCT Article 33(1), since the subject matter of claim 9 does not comply with the criterion of novelty defined by PCT Article 33(2).

1.1 Document D1 describes (the references between parentheses apply to said document):

a glass sheet with at least one double-milled hole (13) with a tapered portion opening out at either end onto each of the glass sheet surfaces, and a cylindrical median portion having substantially the same axis as the tapered portions. Said sheet comprises, inside each milled hole, a coupling part (1) with one (figure 4) or two (figure 10) components.

Moreover, said coupling parts can optionally be mutually assembled to allow the mounting thereof via a coupling

core as per claim 1. Therefore, D1 describes all the features of claim 9.

1.2 Document D2 describes (the references between parentheses apply to said document):

a glass sheet (12) (see page 7, line 34 ff.) with at least one double-milled hole (18) with a tapered portion opening out at either end onto each of the glass sheet surfaces, and a cylindrical median portion having substantially the same axis as the tapered portions. Said sheet comprises, inside each milled hole, a coupling part (26, 28) with or two components (see page 9, lines 1-35).

Moreover, said coupling parts are mutually assembled to allow the mounting thereof via a coupling core as per claim 1. Therefore, D2 describes all the features of claim 9.

2. The glass sheet and the plurality of parts of figure 1a of document D2 are assembled on site to produce assemblies consisting of prefabricated components. Thus, claim 11 does not comply with the criterion of novelty defined by PCT Article 33(2).
